Date: January 8, 2026

MESSAGE

The Convocation of Madras School of Economics (MSE) to be held on January 22, 2026 will be the Third one after MSE was recognized as an Institution of Special Importance with degree granting power with the passing of Madras School of Economics Act 2020. This year degrees will be granted to students who had gone through the B.A, M.A. Ph.D programme in Economics. Diplomas will be granted to postgraduate students in Management Programme. I greet all the students who are graduating and convey to all of them my congratulations and good wishes. You have all crossed an important milestone in your lives. Your future depends upon how the Indian economy behaves. But at the same time, please remember you have an opportunity to shape India's future. MSE looks forward to your close association with it.

C. RANGARAJAN

**Res: F-1, Rangavilas, 23/12 III Main Road, Nanganallur, Chennai 600061

About Chief Guest

Dr. Soumya Swaminathan

Soumya Swaminathan, a pediatrician and global expert in tuberculosis and HIV research, recently served as WHO's Chief Scientist and previously as Director General of the Indian Council of Medical Research (ICMR), Ministry of Health and Family Welfare, Government of India (2015-2017). She assumed the role of Chairperson at the M S Swaminathan Research Foundation (MSSRF) in February 2023. She is also the Principal Advisor to National Tuberculosis Elimination Programme (NTEP), Ministry of Health and Family Welfare, Government of India and the National Science Chair of the Anusandhan National Research Foundation, Government of India.

With over 40 years of experience in clinical care and research, Dr. Swaminathan has dedicated her career to translating research into impactful health programs. As Secretary to the Government of India for Health Research, her efforts were focused on integrating science into health policy-making, enhancing research capabilities in Indian medical institutions, and fostering global partnerships in health sciences.

Dr. Swaminathan received her academic training in India, the UK, and the USA, and has authored over 480 peer-reviewed publications and book chapters. She is a Fellow of the US National Academy of Medicine, the Academy of Medical Sciences (UK), and all major science academies in India. She holds honorary doctorates from prestigious institutions including Karolinska Institute, EPFL Lausanne, and the McGill University, Canada. She currently co-chairs a global commission "Our Common Air" and serves on the Kofi Annan Commission on Food Security. She holds adjunct professorships at Karolinska University (Sweden) and Tufts University (USA).

Currently, Dr. Swaminathan serves on the boards of Alliance Bioversity, Population Foundation of India, Institute for Global Environmental Strategies (IGES) and Women Lift Health, among others. She is a member of the Governing Council of the Tamil Nadu Climate Change Mission, member of One Health and Climate Change Strategic Committee, Government of Tamil Nadu and Chairs the Scientific Advisory Board of the Indian Council of Medical Research (ICMR).

During her tenure as WHO's first Chief Scientist, Dr. Swaminathan established the Science Division focusing on research, quality assurance of norms and standards, and digital health. She played a pivotal role in coordinating global scientific efforts and was instrumental in setting up Covax to ensure equitable vaccine distribution to Low and Middle-Income Countries during the COVID-19 pandemic.

Her current focus is on addressing the health impacts of climate change, especially on women and children and food system transformations to strengthen nutrition security in India and regionally.

Director's Message

Dr. N. R. Bhanumurthy

Madras School of Economics (MSE), which is recognized as an 'Institution of Special Importance' by the Government of Tamil Nadu, is organizing its 3rd Convocation on 22nd January 2026. During the convocation the institute has invited 261 students who have passed out in the academic year 2024-25 in Masters as well as Post-Graduate Diploma programs. In this Convocation, we are also happy to note that for the first time we will be presenting degrees in our Bachelors and Ph.D program as well. The institute will also be presenting eight Gold Medals to toppers in respective programs. I would like to congratulate all the students who are receiving their degrees, diplomas, as well as Gold Medals in this Convocation. While this is a proud moment for all the graduating students, I am sure parents are also equally proud to see their wards receiving their degrees. We sincerely thank all the parents who have put their wards in our institution. We also place on record our appreciation to the Examination department and all the faculty members who have taught these graduating students and staff of the institute for their contributions in organizing this convocation.

Over the years, MSE has been contributing very significantly to both teaching and research in the area of economics and allied subjects such as management. Our students have made us very proud by getting into leading firms, institutions, think tanks, and government agencies. We are sure that our graduating students will add further glory to MSE. We also hope that these graduating students will get involved in MSE's Alumni activities. We once again congratulate all the graduating students and wish them all the success in their careers ahead.

Background of the Institute

Madras School of Economics (MSE) was established by renowned fiscal expert Padma Vibhushan Dr Raja Chelliah in 1993 to impart higher education in economics in Southern India and also to develop the school as a think-tank to advise the Central and State Governments on various economic policies. The Madras School of Economics has continued to grow under the able guidance of Padma Vibhushan Dr. C. Rangarajan (Former Chairman of the Economic Advisory Council to the Prime Minister of India and Former Governor of the Reserve Bank of India) from 2005. MSE has emerged as a leading Centre of Excellence of Post Graduate Teaching and Research in Economics, Environment, Finance and Management in the country. Over the past two decades, MSE offered its teaching programme jointly with Anna University, Chennai initially, and subsequently with Indira Gandhi National Open University, New Delhi and Central University of Tamil Nadu, Thiruvavur. With strong emphasis on quantitative methods, MSE's curriculum is on par with international standards. MSE has been rated as one of the top most Post Graduate teaching institutes in the country.

MSE has also collaborated with many government, non-government, and

academic agencies for furthering economic policy and research in India. It was designated as the Centre of Excellence in Environment Economics by the Ministry of Environment, Forestry and Climate Change, Government of India. It also established MSE-GE Money Decision Science Lab with support of GE money. Recently, it has established a Centre for Public Finance and Policy funded by Government of Tamil Nadu. MSE in its Silver Jubilee Year (2018) obtained "A New Technical Institution" status with the approval of the All India Council for Technical Education (AICTE), Ministry of HRD, Government of India (in April 2018) and started 2 two-year full time Post Graduate Diploma in Management (PGDM) courses, namely PGDM Finance and PGDM Research and Business Analytics.

In recognition of 25 years of academic services of MSE, Government of Tamil Nadu enacted **MSE Act 2020** and recognized MSE as an **Institute of Special Importance** and empowered MSE the degree granting power in Economics, allied subjects and management. MSE has begun its journey as the Institute of Special Importance from April 2021. It is included by UGC in the list of Institutions established under State Legislature Act.

Currently, it offers the following 2-Year M.A. programmes in (i) General Economics, (ii) Financial Economics, (iii) Actuarial Economics, (iv) Applied Quantitative Finance and (v) Environmental Economics. MSE follows all the UGC guidelines and also closely the Tamil Nadu state universities for the academic rules and regulations. It reserves 35% seats for Tamil Nadu residential students and follows the Reservation Policy of the Government of Tamil Nadu for admitting these students. Further, MSE admits students of the Integrated M.A. Programme of CUTN in its M.A. Programs. The last batch of Integrated MA students were admitted in 2022-23. MSE also offers PGDM finance and PGDM Research and Business Analytics Programs. For its PhD program in Economics, MSE is affiliated with University of Madras and Central University of Tamil Nadu. From April 2021, it has been offering its own PhD programs in Economics and Management. It offers Dr. Devaki Muthiah and Dr. A.C. Muthiah fellowships and also MSE institution fellowships to PhD scholars and encourages the scholars holding UGC-JRF to join the program. MSE has also started its own 3-year BA (Honours) program in Economics from the academic year 2022-23 and a 2 year post-graduate degree program M.Sc Data Science from the academic year 2024-25.

From 2025-26 academic year, MSE offers a 5-Year Integrated M.A Degree Program in Economics with exit options for 3 Year BA(Honours) and 4 Year BA(Honours with research). MSE has also started a two year MBA program with specializations in

Finance and Research & Business Analytics.

MSE's Priority areas of research are Public Finance, Macroeconomic modeling, Environment and Climate Change, Trade and Development, Finance, International Economics, Industrial Economics, Actuarial Science, Data Science and Business Analytics. It has completed many research projects funded by many prestigious national and international agencies. MSE has so far successfully completed more than 170 research projects and currently has undertaken a few more projects. MSE has published close to 250 Working papers, 43 Monographs, 4 Occasional papers, 35 Dissemination papers in addition to the research articles contributed by MSE faculty in various National and International journals and edited volumes/books. MSE has three prestigious Endowment Lecture Series, namely Dr. Raja J. Chelliah Memorial Lecture (supported by SICCI and Mrs. Chelliah), Shri R. Venkataraman Endowment Lecture, and G. Ramachandran Endowment Lecture. In addition, MSE regularly has invited lectures by eminent scholars from abroad and India. So far more than 300 eminent scholars have delivered lectures at MSE. MSE has four prestigious Chairs, Hindustan Level Ltd, Chair in Industrial Economics, T.S. Santhanam Chair in Financial Economics, Canara Bank Chair in Financial Economics and Union Bank Chair for Excellence in Banking. MSE signed an MoU with Clearing Corporation of India Limited (CCIL), Mumbai for research collaboration in the area of Finance.

Convocation Address by the Chief Guest

Dr. Soumya Swaminathan

Chairman, Director, Distinguished Members of the Governing Council, respected Faculty Members, proud Parents and Families, and most importantly, the Graduating Students of the Madras School of Economics.

It is a great honour to join you today on this memorable occasion. Convocation ceremonies mark both an ending and a beginning, an ending of years of disciplined study, and a beginning of responsibility, leadership, and public engagement. For each of you graduating today, this moment represents not only personal achievement but an entry into a world that urgently needs thoughtful, ethical, and courageous economists.

The Madras School of Economics has played a seminal role in shaping economic thought and public policy in India. Its alumni have contributed to national planning, global development institutions, academia, and the private sector. You inherit this legacy at a time of unprecedented transformation economically, socially, technologically, and environmentally.

My own professional journey from clinical medicine to public health research, and from national service to global policy, has taught me that careers today are rarely linear. They evolve as evidence accumulates, contexts change, and moral priorities sharpen. What remains constant is the value of strong analytical foundations and a commitment to public good qualities that institutions like this one nurture.

You are graduating into a world facing multiple, interconnected crises. Climate change, economic inequality, public health emergencies, demographic shifts, and geopolitical uncertainty are no longer abstract concepts. They are shaping livelihoods, markets, and governance systems in real time. These challenges are complex, systemic, and deeply interlinked, demanding new ways of thinking across disciplines.

One of the most defining features of these crises is inequality. While shocks such as climate change or pandemics affect entire populations, their impacts are not evenly distributed. Marginalised communities, especially women, children, informal workers, older adults, and the urban and rural poor, bear a disproportionate burden, despite contributing the least to these global challenges.

Consider extreme heat, now recognised as one of the most significant climate-related risks in India. Rising temperatures affect agricultural productivity, labour capacity, health systems, and energy demand. Yet, the economic costs of heat are rarely captured fully in national accounts. Outdoor workers, such as farm labourers, construction workers, and street vendors, experience

productivity losses, income instability, and health risks that are largely invisible in macroeconomic indicators. Women, who constitute a large share of informal and agricultural labour, face compounded risks due to occupational exposure, unpaid care work, and limited access to healthcare.

Children are also profoundly affected. Heat stress and climate variability disrupt food systems, increase food prices, and worsen undernutrition, particularly among low-income households. These shocks have long-term consequences for physical growth, cognitive development, educational attainment, and future productivity. From an economic perspective, this represents a loss of human capital with intergenerational implications.

India's experience during the COVID-19 pandemic further exposed structural vulnerabilities. Informal workers, migrants, women-headed households, and children faced disproportionate economic and health shocks. While aggregate recovery indicators have improved, the unevenness of recovery highlights the importance of distribution-sensitive economic analysis.

This is where your role as economists becomes critically important. Economics has traditionally prioritised efficiency, growth, and optimisation, and these remain essential. However, today's realities demand that the discipline expand its focus to include equity, resilience, sustainability, and well-being. The metrics you choose, the assumptions you make, and the questions you ask shape policy choices in powerful ways.

Economists are uniquely positioned to quantify what is often ignored: the economic value of health, the cost of environmental degradation, the burden of unpaid care work, and the long-term returns on social investments. You can help ensure that climate adaptation, public health preparedness, and social protection are seen not as expenditures, but as investments in economic stability and growth.

For example, investments in heat-resilient infrastructure, early warning systems, and occupational safety measures yield returns through improved productivity, reduced healthcare costs, and avoided mortality. Similarly, investments in maternal and child nutrition generate some of the highest known economic returns, yet remain under-prioritised in many policy frameworks.

Gender-responsive economic analysis is particularly vital. Women's contributions to economies, especially through unpaid care, subsistence agriculture, and informal work, remain systematically undervalued. Climate change and economic shocks often increase women's unpaid labour while reducing their access to income and assets. Policies that fail to account for these dynamics risk reinforcing inequality and undermining long-term development. Children, too, must be central to economic thinking. Investments in early childhood health, nutrition, and education are foundational to building a productive workforce. Economists have a responsibility to frame these investments not as welfare measures, but as strategic economic priorities.

At the same time, no single discipline can address today's challenges alone. The future lies in interdisciplinary approaches. Economics must engage deeply with public health, environmental science, behavioural science, and social policy. Adapting to climate change, for instance, requires coordination across urban planning, labour regulation, energy policy, health systems, and social protection. Economic analysis can guide these decisions by identifying trade-offs, evaluating cost-effectiveness, and ensuring that benefits reach the most vulnerable.

India's development trajectory offers both promise and caution. Rapid economic growth has lifted millions out of poverty, yet inequalities persist across regions, genders, and social groups. As the country navigates its demographic transition and climate risks, economists trained at institutions like the Madras School of Economics have a vital role to play in shaping inclusive, evidence-based policy.

To the graduating students, I offer this advice: remain anchored in evidence, but guided by empathy. Data and models are powerful tools, but they must be informed by lived realities. Engage with communities, listen to diverse voices, and remain open to learning beyond textbooks and spreadsheets.

Choose career paths that challenge you intellectually and align with your values. Success should not be measured solely by position or prestige, but by the impact of your work on people's lives. In a world of growing complexity, humility, collaboration, and ethical clarity will be among your greatest strengths. India and the global community need economists who can think rigorously, act responsibly, and lead with compassion. You are well-equipped for this task, and the world awaits your contributions.

In closing, I return to a principle that has guided my own journey: economics and science are not ends in themselves; they are tools to advance equity, dignity, and well-being.

As economists and social scientists, you will influence policies, investments, and priorities that shape societies for decades to come. I urge you to remember that the true test of economic progress is not how fast we grow, but how well we protect those with the least power and the greatest vulnerability.

I congratulate each one of you and wish you courage, clarity, and purpose as you step into the future.
